- ✓ To promote team spirit and social skills
- ✓ For children and adults
- ✓ For 4-16 players

**Specification:**

- 8 different colored ropes of 4 m each
- 1 gripper
- 4 rollers
- 2 rollers with recess to hold the balls
- 4 splints
- 1 ring
- 1 ball ø approx. 20 cm
- 1 Ball ø approx. 6 cm
- 1 instruction booklet
- Packed in a wooden box LxWxH: 59.5x44x23 cm
- 7.5 kg

**Only together we will reach our goals**  
No one can do it on his own

**No one can do it on his own, only with teamwork the various play and concentration tasks can be solved.**

Building a pipeline, stacking and forwarding rollers, transporting balls, forming and dissolving knots, weaving and so on.

Different demands for children, adults, teams and companies. The participants learn effective communication, cooperation, active listening, to balance and to take responsibility. Between

4 and 16 participants can play.

The Pedalo-Team-Game-Box is not only suited for schools, movement or sports lessons, for remedial courses and stays in school country homes, respectively school trips, it is also very popular for leisure events of any kind.

Using the Team-Game-Box in the adult education, in leadership and management courses, proves to be consistently effective and successful.

The extensive play instructions and the motivating equipment allow a huge variety of application possibilities and leave room for own creative ideas.

## Rolling ball

### Number of players:

2 – 16

This game is excellently suited for competitions. With a stop-watch the fastest team can be determined.

### Material:

2 rollers with recess to hold the balls, 1 ball depending on wishes, all splints and depending on variant all ropes

### Game manual:

The two rollers (one of them with applied ball) are placed with a few meters distance to each other on the floor. How do the ball reach the other roller without changing the position of the rollers and without touching the ball with the hands?

#### Game variation:

1. The players are allowed to hold the splints...

- in both hands
- only with one hand
- only in pairs with one finger each
- only when sitting by resting the splints on the upper legs
- only by using the ropes (to this 2 ropes for each splint are put in the notches and are hold from 2 or optionally 4 players. Depending on whether the rope is held in long or short distance, the degree of difficulty is affected

2. Routing...

- over hurdles like chairs or tables
- through doors or in a circle

3. Transport of the ball ...

- the ball is forwarded in the splints. The players form a continuous chain to forward the ball to the goal. Only if the ball is given to the next teammate, the player may enqueue in the front row again

## Ball crane

### Number of players:

2 – 16

This game is excellently suited for competitions. With a stop-watch the fastest team can be determined.

### Material:

Gripper with ropes attached (half length = 2 players each rope), ball, 2 rollers with recess to hold the ball

### Game manual:

The two rollers (one of them with applied ball) are placed within few meters distance to each other on the floor. How does the ball reach the other roller without changing the position of the rollers and without touching the ball and the rollers with the hands?

#### Game variation:

1. The players are allowed to hold the ropes...

- with both hands
- only with the right/left hand

2. Rope length

- half length of the rope for 2 players each rope
- whole length of the rope for 1 player each rope

3. Routing...

- over hurdles like chairs or tables
- through doors

4. Transport of the ball ...

- in the air
- on the floor (roll the ball by using the gripper on the floor – e. g. slalom or through an obstacle course)

5. With closed eyes. There is only one teammate with opened eyes who guides the other blind teammates through voice instructions.

## Leaning Tower of Pisa

### Number of players:

2 – 16

### Material:

Gripper (= rope crane) with ropes attached (half length = 2 players each rope), ball (= roof dome), all rollers (= columns)

### Game manual:

The 'Leaning Tower of Pisa' has collapsed. Coincidentally all columns felt by chance in such way that they now stand scattered around, fortunately including the column on which the roof dome is fastened in the end. Immediately there are many volunteers meeting around the tower to rebuild it but they are faced to some problem. If the columns are touched with hands they will turn to dust. Furthermore, the columns are too heavy to be stacked by any one person alone.

So only if the busy assistants find out how to steer the rope crane, they will succeed to rebuild the tower column by column. The rope crane does not like that assistants coming too close to him, he permits steering only by using the long ropes. With the roof dome on top, the 'Leaning Tower of Pisa' is finally rebuilt – how long – that depends on the players' architectural capabilities.

### Game variation:

There is only one assistant who is able to see.

This game is excellently suited for competitions. With a stop-watch the fastest team can be determined.

## Turn the 'big wheel'

### Number of players:

4 – 16

### Material:

Wooden ring, 1 rope for each 2 players. For slalom add the rollers

### Game manual:

Roll the ring over a prescribed route (optionally slalom). The ring is steered through ropes which are held by the players oppositely. The ring must always be in contact with the ground and may not tip over completely. If it has been tipped over - what cannot always be avoided – the team has to start again from the original position.

### Game variation:

1. Routing ...
  - slalom through the wooden rollers
  - over obstacles, then continue rolling
  - roll over obstacles (e. g. over the wooden splints)

### 2. Transport

- the ropes are not led through the wooden ring, they only can be used to push the wooden ring from its outside.

3. With closed eyes. There is only one teammate with opened eyes who guides the other blind teammates through voice instructions.

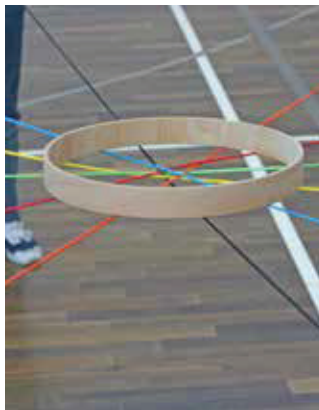

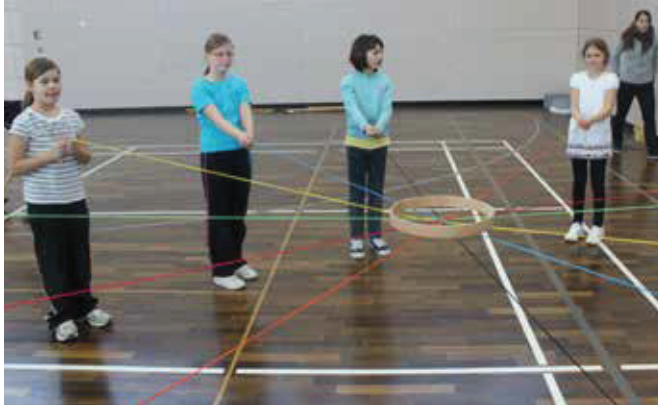

This game is excellently suited for competitions. With a stop-watch the fastest team can be determined.

**Number of players:**  
4 – 16

**Material:**  
Ring (= ropeway), 1 rope for each 2 players

**Game manual:**  
The ropeway runs:  
In this game the ropeway is put on at least 2 horizontal tensioned ropes (= 4 players at least). Through skillful acting the ropeway has to be transported towards one of the players, it must not fall down or touch the ground.

'Repair of the ropeway' (change of carrier ropes):  
A safety investigation has shown that the present carriers are defective. They have to be replaced without touching the ropeway. For this at least 4 assemblers come to help the current players and take over the ropeway with their ropes.

## Game variation:

1. The players are allowed to hold the ropes...
  - with both hands
  - only with the right/left hand

2. With closed eyes. There is only one teammate with opened eyes who guides the other blind teammates through voice instructions.

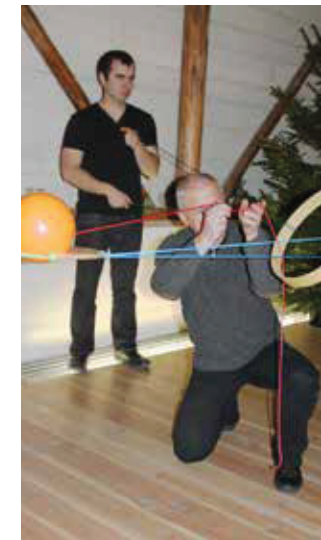

## Game manual:

With the help of two knotted ropes, 2 or 4 players hold the tube vertically in the room and define two separate areas. All remaining players have to transport the rollers and balls from one side of the room to the other by using the gripper with attached ropes. The whole equipment must be passed through the tube without touching it.

## Material:

Wooden ring (= tube), gripper with up to 6 ropes attached, rollers and balls optionally

**Number of players:**  
6 – 16

## Game variation:

1. The players are allowed to hold the ropes only at the ends.

2. For higher degree of difficulty, the ring could be positioned free-standing on the floor or at a table. At a touch, the ring may tip over and the game will be lost.

### Number of players:

2 – 16

### Material:

2 ropes for marking, several treadstones: ring (= island), rollers + splints (= tree parts)

### Game manual:

The group has been on the move for days. To reach the goal all team members must arrive at the other side of the river without getting wet (the river is marked by 2 ropes - lying parallel to each other - on the ground. Depending on the condition of the group, the distance may vary = different degree of difficulty). Only the scattered tree parts can help to cross the river. The first one who is brave enough to enter the river, places the tree parts cleverly that way so that his teammates are able to reach the next part safely. The teammates who are moving up, supply him with other tree parts. It is probably a good idea to place the saving island at an extremely difficult position as the whole island offers protection against the water. The last one collects all tree parts and passes them forwards. Will the team be able to manage the task and succeed in crossing the river without wet feet and by taking all of the tree parts to the other side of the river?

### Game variation:

1. Group members are allowed to (are not allowed to) help and support each other.
2. Tree parts must be in constant contact with a group member.
3. One of the group members must cross the river with closed eyes.

### Game manual:

Under a spider net, on a tower stacked from several columns, there is a precious treasure in form of a marvellous crystal ball which can do miracles. It would be a dream to get it. But the crystal ball is strictly guarded by a gigantic spider who rests on the treasure. Only if the rescuers succeed to lift the spider over the tower and the glass ball, the way to the treasure is free for them.

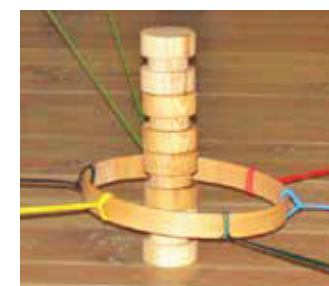

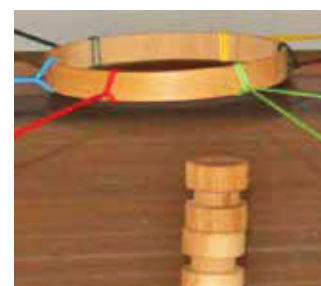

The spider may not touch the tower nor the glass ball. In order to avoid touching, the rescuers have to pull at the 'spider's legs' evenly and at the same time. Be careful as the spider is still sleeping.

### Material:

6 rollers (= columns), ring (= giant spider) with ropes attached (feet), big ball (= crystal ball)

### Number of players:

2 – 16

### Game variation:

There is only one courageous treasure hunter with opened eyes. The others are fearful and prefer to play with blind-folded eyes.

**Number of players:**  
4 – 28

**Material:**  
Ropes, knotted at the ends, according to the number of players. Maximum 4 players each rope (rope part/color)

**Game manual:**  
As a starting point there is a sample created, for example a '8'. This rope remains lying on the ground as an example. Now the players have to copy this knot whereby they have to follow some rules. At first they tie the needed ropes according to numbers of players at the rope's ends (one rope per four players). Then the players hold the rope with one hand by standing regularly distributed (up to 4 players per rope).

**Important:** The rope must not be released during the gameplay. Now the players have to move in such a way that they reconstruct the knot and the knot ends up in the centre of the group. Whether the players are climbing over, under or even passing through, the rope remains in their hand without changing hands at any time. Will the group be able to master this task?

**Game manual:**  
The ring (with ropes attached) is held by the players with tensioned ropes in horizontal position. The ring is besieged by an invisible little man who needs to be out-played. To accomplish this, the ring has to be turned up-side-down once, without touching it with hands, because the little man is vicious. How should this work?

**Material:**  
Ring with ropes attached according to number of players

**Number of players:**  
4 – 16

**Please note:**

- At the beginning and at the end, no ropes may cross each other.
- No player may release his rope.
- The ring may not touch the ground.
- At the end of the game, all players have to stand in viewing direction to the ring.

Light barrier

Number of players:

8 – 16 'rope holders' (guardians)  
+ X additional players (thieves)

Material:

Ropes (= light barriers), all items  
of the box (= treasure box)

Game manual:

There are valuable treasures behind the light barrier, which the thieves want to bring in their possession. To arrive at the treasure box, the thieves have to cross the circle of the light barriers without touching them. If just one thief touches any light barrier, alarm is immediately triggered and there is no escape!

But the treasure guardians are attentive and make it anything but easy for the thieves. They stretch the light barriers opposite to each other in various heights criss-cross through the space, so that only 'master thieves' will find access to the treasure and succeed in arriving the treasure box – when at all.

Game variation:

- 1. Each thief steals a treasure.
- 2. The thieves form a chain to pass on the treasures.

Hurdle race

Game manual:

The rope holders form two opposite lines. Each two opposing players stretch one rope whereby they press the rope against a previously agreed point of their body, in order to hold the rope as still as possible. During the course of the game the distance between the ropes as well as the height of them, is increased after each round.

In doing so:

Flat rope and wide distance  
= easy  
High rope and narrow distance  
= difficult

Begin with easy level. The players who do not hold a rope, now try to step over the ropes without touching them. Afterwards the players change their position with those of the rope holders until it was everybody's turn.

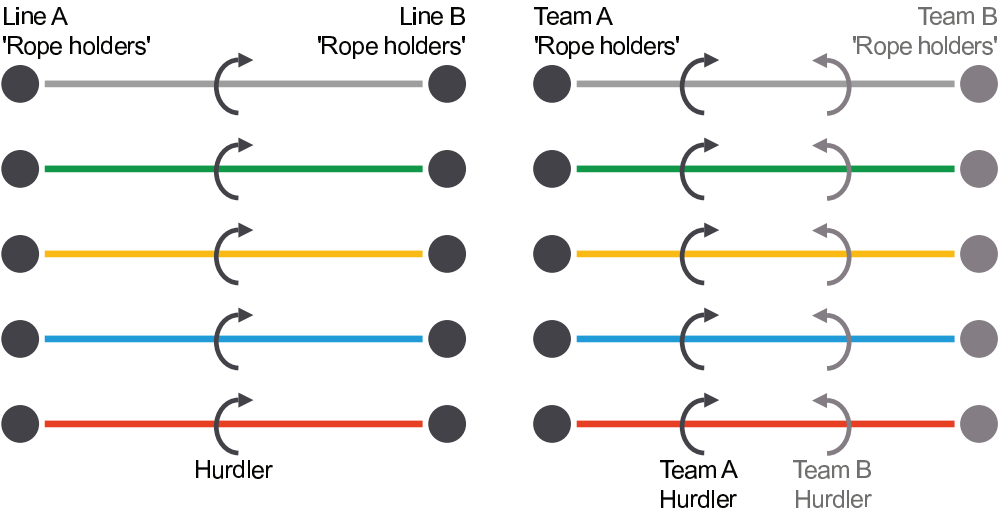

Material:

All ropes

Game variation:

- 1. If a player has touched a rope while crossing it, he becomes a 'rope holder' and stays such during the remaining game-time, until there is finally only one player without mistakes – the winner!
- 2. If a player has touched a rope while crossing it, it will be marked as mistake. All mistakes are added up through several rounds. At the end of the game the number of mistakes is compared.

This game may also be played in two groups for competition character. Which group has less mistakes? In case of a tie, the speed determines the winner.

## Further Pedalo® Team Games

- ✓ Games to promote team spirit and social skills
- ✓ Depending on model, playable with 2-16 players
- ✓ Coming each with detailed illustrated instruction leaflet
- ✓ Whether at school, in kindergarten, at birthday parties, club or company events, the ingenious Team-Game-Boxes move young and old alike with joy

No one can do it on his own, only in teamwork the various play and concentration tasks can be mastered. It is not always the seemingly easiest way

which leads to achievement. Communicate, cooperate and collaborate, this is the motto and core in order to fulfill all challenges cleverly. Quite dodgy, at times

child's play and apparently easy, at other times fairly demanding - and yet never boring.

**Pedalo® Team-Game-Box 'Three'**  
170 03000  
For 4-16 players

The box combines cooperation and conflict in a playful way. Working together, looking for solutions, developing strategies, handling tasks concentrated, feeling emotions and learning to deal with victory and defeat in team competitions. These are only a few of many great aspects which the players learn during the games.

**Pedalo® Team-Game-Box 'Two'**  
140 05000  
For 2-16 players

The Team-Game-Box 'Two' affords more than 20 amazing team games which all foster social skills. The players' concentration, abilities and creativity are challenged at the same time by games such as 'hazardous goods transportation', 'summit crossing', 'pack your bag', 'sunrise', 'change of scenes' or 'Sirtaki dancing'.

## General information and warning hints

All rollers and splints are made of ash tree. The gripper is made of birch multiplex and the ring of beech.

All wood elements are oiled and can be wiped off with a damp cloth in case of need.

In order to prevent the ropes from knotting while being transported in the storage box, we recommend placing them properly wound up in the box after playing.

**You would like to order, have any questions or suggestions?**

You can reach us by phone Monday to Friday under the number +49 (0) 7381 - 9357-0 or via email-address [info@pedalo.de](mailto:info@pedalo.de)

Dear customer,

the Pedalo-product you have chosen is made of natural wood. Differences in color, structure, wood grain, small included knots or scars, prove the genuineness of the product. They are natural and therefore signs of - using original wood - and no quality reduction.

### WARNINGS

**ATTENTION!** Not suitable for children under age 3. Choking hazard such as from small parts. Adult supervision required.

**ATTENTION!** Long cord – RISK OF STRANGULATION! Adult supervision required.

**ATTENTION!** The packing is not part of the product and have to be disposed.

Protect the wooden parts from damp and wet.

The Team-Game-Box 'One' is meant for using from persons at the age of 5 up.
