

Assembly instruction
Safety small training goal
„transportable“, foldable
1,20 x 0,80m
Cat. no.

Thanks for choosing 6SRUW7KLHPH equipment. In order to enjoy this product please note the following instructions for safety, use and maintenance before assembly.

This goal is preassembled. Please consider the following instructions to install the goal.

1. Scope of delivery:

- 1 preassembled Safety small training goal including net (see bottom picture).

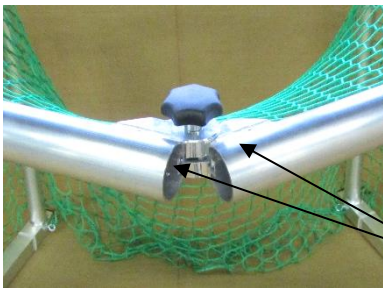

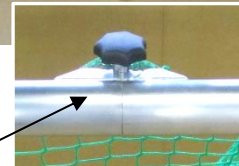

2. Open the goal:

Open the goal completely. If necessary release the hand wheel at the crossbar slightly. Fasten the hand wheel again after having opened the goal (see 2nd picture bottom right).

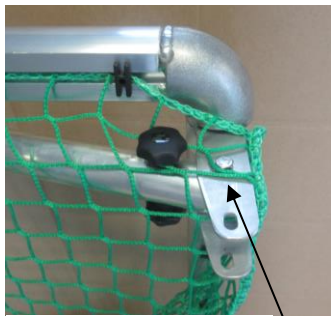

Fold crossbar by 180 degrees and fasten hand wheel again

Caution: Open tube ends at crossbar have sharp edges. For technical reasons it is not possible to deburr them!

Then remove the star grips at both net hoop hinges (see 1st picture bottom left). Open both net hoops so far that holes of net hoop hinge and net hoop are congruent (see 1st picture bottom right). Stick from above 1 star grip screw per net hoop through the holes of net hoop hinge and net hoop and screw 1 star grip each (see 2nd picture bottom left and right).

1. remove star grip screw and star grip

star grip screw

star grip with thread inside

2. open net hoop

3. stick star grip screw through the holes of net hoop hinge and net hoop. Then screw star grip.

3. Storage of the goal:

To save space during storage unscrew star grips and fold net hoops. Then fix again star grips at the net hoop hinge so that they don't get lost (see picture bottom left). Now unscrew the hand wheel so far that the crossbar can be folded. Then tighten the hand wheel again (see picture bottom right).

4. Ground fixing:

The ground bars are equipped with boreholes of 25 mm closed with black plastic caps which serve to fix the special anchoring systems for the goal. Remove plastic caps before ground fixing with the help of a screw driver.

Different systems for the ground fixing are available (**see Sport-Thieme accessories**). The anchoring system is not part of the delivery. The use of the goal without corresponding anchoring system is at your own risk.

5. Maintenance, safety and storage instructions:

Check screwed fastenings regularly and change damaged and wearing parts if need be.

Notice: Due to our continuous quality check of products and equipment technical modifications are possible.

This goal is constructed only for soccer matches and not for other purposes. Check all screwed fastenings before use and repeat it from time to time.

It has to protected against overturning at any time. Do not climb net, goal frame and crossbar as this may influence stability and function of the hinges. It is not allowed to fix additional parts or extensions at the goal frame which may impair the safety of the goal (according to DIN EN 16579).

To avoid damage and misuse goals have to be stored secured and in an upright position when not in use.

Only use water for cleaning the surfaces. Do not use alcohol or any aggressive chemicals!

6. Inspection and maintenance:

- a) Visual inspections should routinely be realized before each use.
- b) Functional inspections should take place at least every six months or according to manufacturer's instructions/national regulations/standard specifications.
- c) A general inspection should be realized at least once a year or according to manufacturer's instructions/national regulations/standard specifications. The results should be documented correspondingly. The following table shows an example of an inspection sheet.

Inspection sheet for goals

	Identification number of goal		Position of goal	
Date	Kind of inspection/maintenance Audit/maintenance level or otherwise	Statements	Measures taken	Checked by
Goal size		Kind of goal		
Manufactur		Date of manufactur		
Date of purchasee		Supplier's information for spare parts		
Date of inspection/maintenance/repair:				
Nature of ground and current weather conditions:				
Result of the inspection (passed/failed):				
Necessary measures:				
Rechecked by:				

The general inspection has to be realized according to E.3 (table E.2) EN 16579.
